

COMBISAFE ATTACHMENTS FOR C/S SYSTEMS

To address the ever evolving challenges of modern construction, we have developed a broad range of versatile attachments that deliver the highest standards of safety regardless of your building structure type.

Whether using one of our standard attachments, or a selection from the widest range of special order fitments in the market, we offer a seamless edge protection resource that integrates fully with your construction process and work programme.

The following attachments are a small sample of what Formsafe Systems is currently able to supply. If the solution you require is not shown, please contact our customer service team.

COMBISAFE ATTACHMENTS COMPONENTS FOR C/S SYSTEMS

Flexi Attachment

Provides post attachment at an adjustable offset up to 360mm on vertical surface for beam webs, walls, facades, shaft sides of slab edges.

Steel Jaw Clamp

Ensures secure attachment to steel beams and columns. Jaws can be re-positioned to increase the offset or to attach in both the horizontal and vertical plane

Timber Beam Attachment

Used to attach to timber soffit form beams and proprietary forming systems.

Two models available for form beams with flange thicknesses of 40mm and 60mm.

Multi Clamp

Versatile attachment covering a wide range of applications. Can be used horizontally or vertically over thicknesses ranging from 20mm to 500mm.

Multifoot

Used for horizontal surface applications. Three points of support for accurate installation on uneven surfaces.

Plastic Sleeve/Plastic Plug

Simple pre-planned attachment, cut to required length and fitted with Plastic Plug before being cast-in to the slab.

Compatible with Safety Post.

Balcony Attachment

Designed to use cast-in channels or the fixings for permanent handrails.

Includes fixing slots that accommodate large variations in diameter and spacing.

Stair Attachment

Supports systems on stairs, allowing access to both top surface and soffit.

Creates space for finishes and nosings.

Steel Clamp

Small, stable clamp attachment for steel.

Grips to steel between 10mm and 50mm both horizontally or vertically.

Verti Clamp

Clamps to narrow members from 0mm to 150mm such as steel sheets.

Features reversible jaws and can be mounted both horizontally and vertically.

COMBISAFE ATTACHMENTS COMPONENTS FOR C/S SYSTEMS

Shuttering Attachment

Mounted vertically and used both as an edge protection support and as a shuttering support.

Using a single fixing point a wide range of applications can be covered.

Bridge Attachment

Used as edge protection for bridges, using the bolts for the permanent bridge barrier.

Can also be used for other applications.

Bridge End Attachment

A compact and rapidly deployed attachment, designed primarily for construction joints on bridgeworks, and other starter bar applications.

Bridge Parapet Plate

Adjustable steel plate with bolt socket that can be fixed directly outboard of the existing parapet prior to removal.

Eaves Attachment (Adjustable)

Adjustable attachment for roof edge protection.

The adjustable post holder gives positioning flexibility.

Used together with Telescopic Arm or Rear Support. (Not Shown)

Eaves Attachment Extension (Adjustable)

As the standard Eaves Attachment (Adjustable), but longer allowing more flexibility for post locations

Facade Bracket

Provides post socket on a vertical face.

Designed to work with Filigree Edge Attachment but can be fitted independently.

Pre Cast Attachment

Cast into pre-cast at factory, delivered with 220mm sleeve to be inserted before topping is poured.

Permits safe access for levelling off or other surface work.

Pre Cast Edge Attachment

An attachment to be used in precast concrete slabs with pre-fitted concrete shutters. To be combined with Flexi attachment or Façade attachment to support edge protection.

Flat Sheet Roofing Attachment

For mounting to the standing seam of suitably sheeted roofs.

Easily clamps to seam and the angle of Safety Post Attachment is adjusted to the gradient.

COMBISAFE ATTACHMENTS COMPONENTS FOR C/S SYSTEMS

Jamb Attachment

Provides clear floor by fitting to vertical surfaces on slab edges, upstands, walls, shaft sides and reveals.

Front Attachment

Mounts vertically to provide both edge protection and shuttering support. Can also be mounted horizontally..

Variable Angle Attachment

Attachment for pitched or flat roofs, slabs, walls etc.

Can be set at 5 different angles between 0° and 90° to the base plate.

Variable Flexi Attachment

Based on the Variable Angle Attachment frame, can be adjusted up to 970mm.

Suitable for assembly on facades with long roof extension.

Vertical Tube Attachment

Used to fix edge protection on vertical circular tubes. Two models available - 48mm with coupler for scaffold tubes, and a 76mm coupler.

Anchor Socket

For use in preplanned edge protection.

Socket is welded to beam and can be adjusted to allow work to be carried out on the slab edge.

Ground Support

Used to support the Steel Mesh Barrier as a demarcation solution only. Used to indicate hazards beyond the line of the barrier, like excavations, traffic areas, roof edges etc.

Elbow

This versatile attachment re-aligns the Safety Post mounting by 90°. Can be used as a beam hanger when the Timber Beam Attachment is used for vertical form beams.

Multi Clamp Adapter

The Multi Clamp Adapter 30° places the safety post outside the stair to maximize stair width. Works on both the left and right hand side of most stairs with a 25-35° stair angle.

Slab Edge Bracket

Mounted vertically and used both as an edge protection support and as a shuttering support. The Slab Edge Bracket is secured using the tie holes

COMBISAFE ATTACHMENTS COMPONENTS FOR C/S SYSTEMS

Aluminium Beam Attachment

Used to attach to aluminium soffit form beams and proprietary forming systems. The attachment is quickly and easily secured to the form beam by hammering the wedge home. It can then be used as both a Safety Post Attachment and a Shuttering Support using the nailing plate.

Cast In Tray (Circular)

The Multi Foot (Art no. 4290) can be fitted to the structural slab before the finishing screed is laid and it is then protected from the poured concrete by the Cast-In Tray. Permits a screed of up to 50mm to be poured around the Multi Foot, leaving access for easy removal and even re-use of the Cast-In Tray.

Steel Mesh Barrier Holder

The Steel Mesh Barrier Holder allows the barrier to be installed at any height on the Safety Post, facilitating work under the barrier, and enabling the barrier to be parallel with the working surface at all times.

Toeboard Holder

Fitted to the edge protection Safety Post to hold wooden toeboards in position.

The design allows it to be fitted or dismantled with the guardrail in place.

Safety Post

When mounted in the various attachments and combined with the Steel Mesh Barrier, forms a safe fall prevention solution. Can be used on its own or with Steel Mesh Barrier Holder. Permits fast, easy assembly and removal.

Adjustable Safety Post

A combined Safety Post and Steel Mesh Barrier Holder.

The Holder is set to the required barrier height on the Safety Post. Permits fast easy assembly and removal.

Rebar Socket (Circular)

The socket is fixed at a junction of the rebar mesh before further reinforcements are added and the concrete poured. The use of the robust hook and anchor ensures the socket will not move while the casting table is oscillated or vibrated, or while the concrete surface is being keyed.
