

# AIRODEK SLAB FALSEWORK SYSTEM

Airodek is a high-efficiency, low-weight slab falsework system, ideal for slabs up to 700mm thick. Designed for rapid assembly, one operative can set up as much as 40m<sup>2</sup> per hour, dramatically cutting down on both time and labor costs.

Airodek is not only fast but also safer, allowing for assembly from below to minimize high-altitude risks. It's engineered for versatility with minimal components, accommodating various site demands effortlessly.

Available in several configurations, including Prop & Panel and Decking with or without Dropheads, Airodek combines safety, speed, and ease into one powerful system.

"Airodek" is a registered Altrad RMD Kwikform trademark

# AIRODEK SLAB FALSEWORK SYSTEM

Product Description	Heading
Element Widths	1800   900 mm
Element Lengths	300   600   900 mm
Form Sheet	Ply or Composite

## Advantages

Streamlined design, featuring only a few components, enables rapid setup and takedown,

Assembling panels and beams from below the soffit lowers the risks associated with working at height.

The system's adaptable configurations are designed to meet a variety of site and user specifications efficiently.
