

BAG

CIRCULAR COLUMN CARDBOARD FORMERS

BAG® Column Formers are a single use formwork system that gives an excellent smooth fair face surface finish.

Our Column Formers are manufactured by welding together several layers of high quality polyethylene coated kraft paper, which are spirally wound and bonded together by heating the polyethylene.

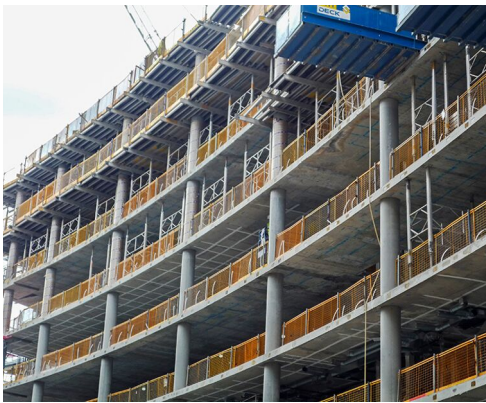

The column formers are water resistant due to the manufacturing process and the outer layer of foil, both of which seal the column former against humidity.

BAG

CIRCULAR COLUMN CARDBOARD FORMERS

Product Description	Heading
Tube widths (I/D)	150 200 240 250 300 350 400 450 500 550 600 650 700 750 800 850 900 950 1000 1050 1100 1150 1200 mm
Weight	From 1.24 kg/m ² to 13.21 kg/m ²
Corrosion protection	Water Resistant
Max pour height	4.00m to 6.00m

Advantages

Lightweight and easy to handle as opposed to steel shuttering.

BAG Column Formers feature a textured finish option. Several different finishes are available on request.

Easy to strip, no mould oils required.
