

ACROW PROPS STEEL PROPPING

Acrow Props are steel props designed to support a range of floors and temporary beams.

Acrow Props are manufactured from an outer tube 60.3mm Dia and an Inner tube of 48.3mm Dia. The threaded portion is friction welded to the outer tube to produce a lighter weight Prop.

Adjustable Steel Props are available in sizes No.0 to No.4.

A range of Heavy Duty Acrow Props which are more suitable for higher loads is also available.

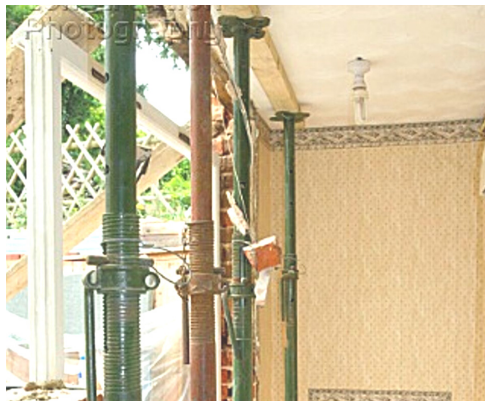

ACROW PROPS STEEL PROPPING

Product Detail	Information
Sizes	0 1 2 3 4
Height (Closed)	1.04 1.75 1.98 2.59 3.20 m
Height (Open)	1.83 3.12 3.35 3.96 4.88 m
Inner Length	1.00 1.63 1.98 2.54 3.15 m
Outer Length	1.02 1.48 1.68 1.68 2.06 m
Weight	11.28 16.34 17.48 20.20 23.84 kg

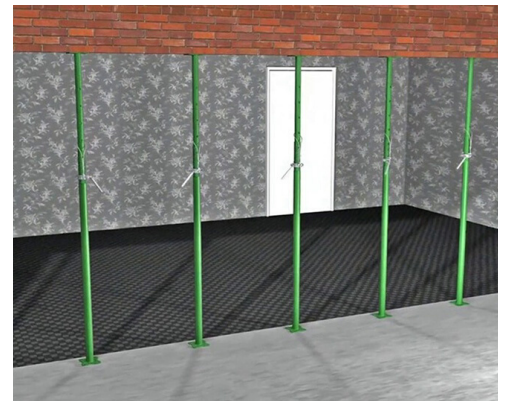

Advantages

Ideal for temporary support of lintels, steel beams, brickwork, and cantilevered slabs during building or repair work.

Provides Falsework support to reinforced concrete and beams

Relatively lightweight design offers easy portability and quick installation by one person.
