

FDI HEAVY DUTY SOLDIERS HEAVY DUTY PROPPING

FDI Heavy Duty Soldiers are sturdy and extremely easy to build into beams of any length. FDI Heavy Duty Soldiers can be used in conjunction with Aluminium or Timber Beams and FDI Tie Bar in the construction of straight, curved and conical walls.

Nine standard lengths allow almost unlimited scope for assembling wall formwork of virtually any height, width and shape. Ties can be fixed virtually anywhere along the FDI Heavy Duty Soldier length, allowing complete freedom to create the optimum design.

FDI Heavy Duty soldiers can also be used for propping and back propping of walls and slabs.

FDI HEAVY DUTY SOLDIERS

HEAVY DUTY PROPPING

Product Description	Heading
Soldier Length	9 36 54 72 90 180 270 360 cm
Component Range	Connectors, Jacks, Base Plates and Head Plates
Soldier Weight	20.8 kg/m per meter
Waling	T150 Aluminium Beams H20 Timber Beams
Slab Support	Scaffolding Alulight Props
Applications	Slab Support Wall Formwork Bridge Deck Support Heavy Duty Shoring Facade Retention
Special Features	Load capacity of up to 100 kN Highly flexible with range of beam lengths and components

Advantages

Highly flexible with a range of beam lengths and components.

Suitable for wall and slab support

Supplied Galvanized
