

LAYHER ACCESS SCAFFOLDING SYSTEM

The Layher Scaffolding System, commonly referred to as a "ring system," is widely regarded as the best scaffolding system available in today's market. Featuring a unique 360° connection technology, the Layher All-round system offers unparalleled flexibility in system scaffolding, making it suitable for a wide variety of access applications. From construction sites and power stations to chemical plants, shipyards, and public arenas, the Layher All-round scaffolding system proves its versatility and effectiveness.

Known for its durability, ease of handling, and the added benefit of being hot-dip galvanized, which enhances its quality and longevity. Manufactured in Germany to engineering perfection, Layher scaffolding systems are certified to DIN ISO 9001:2000 and meet the highest European standards, along with all relevant EN standards.

LAYHER ACCESS SCAFFOLDING SYSTEM

Products Available

Internal Access (with storey ladders in hatch type decks.)

Modular Stairways
