PERMAFORM
PERMANENT FORMWORK

Permaform Permanent Formwork is a multi purpose system that is used mainly as formwork for foundations and slabs It is also usable as sheeting for building pits and as a dust protection screen.

Permaform is available in a variety of thicknesses. Its light weight design makes it easy to lay by hand. Permaform can be shortened and adapted on the building site using simple tools.

Permaform Permanent Formwork is recycleable and groundwater neutral making at an environmentally friendly choice.
