

SKY REACH ANCHOR PERSONAL FALL PROTECTION

The Sky Reach Anchor is a fast, intuitive, lightweight overhead personal fall protection anchor device primarily used during decking for horizontal formwork operation. It rotates for 360° usability.

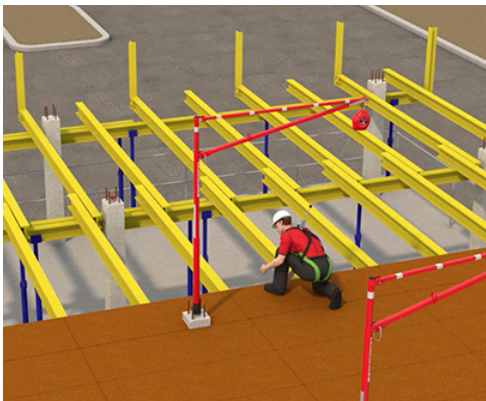

Sky Reach Anchor has no trailing cables or wires. With an operating radius of 8.5m the Sky Reach Anchor gives access to a surface area close to 230m² when used with a 6.2m retractable fall arrest block and harness extension.

With a horizontal boom of 2m the Sky Reach Anchor is intuitive, easy to use, quick to install and removes the need for cranes.

SKY REACH ANCHOR PERSONAL FALL PROTECTION

Product Detail	Information
Height	310cm
Max area coverage	230m ²
Weight	25kg
Corrosion Protection	Fully galvanized
Relevant Norms	EN795:2012 B CE
Special Features	<ul style="list-style-type: none">• Can be carried and installed by hand by one person without the need for a crane.• Folds in seconds for relocation, crane access and storage.• Delivers a 360° operating radius of 8.5m.• Reflective tapes on booms gives good visibility for crane operatives.

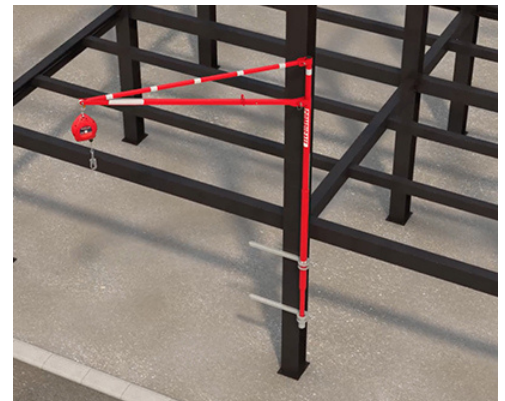

Advantages

Can be carried and installed by hand by one person without the use of a crane

Gives access to a working surface area close to 230m²

Fully compliant to EN795:2012 Type B and CE certified by DEKRA EXAM GmbH
