

WS10 MULTIFORM WALL FORMWORK

WS10 Multiform is a Large Area Formwork System that is prefabricated dependent on project specifications enabling it to handle many different types of task as the shape, size, tie-hole pattern and form-facing of the elements can be adapted to suit any requirements which in turn permits any pouring rate as it can be easily dimensioned for any fresh concrete pressure.

WS10 Multiform cuts equipment costs by allowing a high number of repeat usage and the short forming times cut labour costs down. Cranage is also reduced due to the large optimised shifting units.

A range of practical accessories are also available for safe and easy handling.
